

CHUKWUMA EDWIN

SOFTWARE ENGINEER/DEVELOPER (FULLSTACK, BACKEND HEAVY)
(Python/Django)

CAREER OBJECTIVE

A software Engineer/Developer with a keen interest in quality delivery, majors in PYTHON/DJANGO with practical skills. I wish to work with a diverse group of people as I desire growth from available opportunities

EXPERIENCE

- Design, implement and deploy software with over 5000 users. Latest being the LEAVE MANAGEMENT SYSTEM, Canteen Management App for use in Federal Medical Center
- Design, implement and deploy an Electronic Management Records application (EMR) for hospitals (Personal project).
- Modify existing software to correct errors, allow it to adapt to new hardware, or to improve its performance.
- Head of the EMR Support Team responsible for the smooth migration from traditional paper documentation to electronic documentation in FMC Keffi.
- Consult with end users about software system design and maintenance.
- Supervise the work of programmers.
- Train novice into programmers.
- Train users to use new or modified equipment.
- Design, build, or maintain web sites
- Evaluate code to ensure that it is valid, is properly structured, meets industry standards and is compatible with browsers, devices, or operating systems.
- Develop databases that support web applications and web sites.
- Select programming languages, design tools, or applications.
- Develop or implement procedures for ongoing web site revision.
- Test programs or databases, correct errors and make necessary modifications.
- Modify existing databases and database management systems or direct programmers and analysts to make changes.
- Develop local Applications to automate simple processes.
